

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service, so I'm urging you to reject the flat- fee proposal that threatens how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

If passed, the flat fee proposal you are would be unfairly costly to the many who make few long distance calls, while lessening costs for people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to subsidize big businesses, who can easily afford to pay than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

David McCosh
